

Eyegaze Edge[®]

Reclaim Control

EYEGAZE

Giving You the Edge

Perfectly calibrated and finely tuned, the Eyegaze Edge® has been known to work when no other eye tracker will. Built with the imperfect eye in mind, the Eyegaze Edge® accommodates numerous atypical eye conditions, which allows the user to continue communicating with the world as their diagnosis progresses.

Unique Benefits

- Safe, highly accurate, and easy to use
- Requires only 1 eye to operate
- 15-second calibration
- Comfortably use in any position
- Works with droopy eyelids and partially blocked pupils
- Lowest infrared light used over any competing device, decreasing eye strain and fatigue
- Predicts a gaze point accurately for users with large or small pupils
- Can be operated by individuals with nystagmus
- Can be operated by individuals as young as 2 years old
- Modular mounting options make it easy to mount on tables, wheelchairs, rolling mounts, or any sturdy surface

Eyegaze Edge® Includes

- Eyegaze Edge® tablet
- Eyeworld communication software
- Eye tracking or head mouse package
- Speech synthesizer (or use a banked voice)
- Personalized installation
- Extensive training and support
- Technical support for a year
- A 1-year full coverage warranty

Eyegaze Edge® Model 1000

This model is a touch-based communication device. Should a user's diagnosis progress, it can quickly be upgraded to use an eye tracker.

- Protective case
- Hand strap
- Optional kickstand
- Touch keyboard

Best for Users With

- Lou Gehrig's Disease (ALS)
- Cerebral Palsy (CP)
- Brain Injuries and Strokes
- Spinal Cord Injuries
- Muscular Dystrophy
- Spinal Muscular Atrophy (SMA)
- Werdnig-Hoffmann

Available Options

- UIRT (control an infrared remote device)
- Endurance Pack (extended battery life)
- Head mouse access
- Switch access
- Stylus

Eyeworld

Eyeworld provides a framework for editing and creating interactive pages. Eyeworld is a communication and control package designed for children and adults.

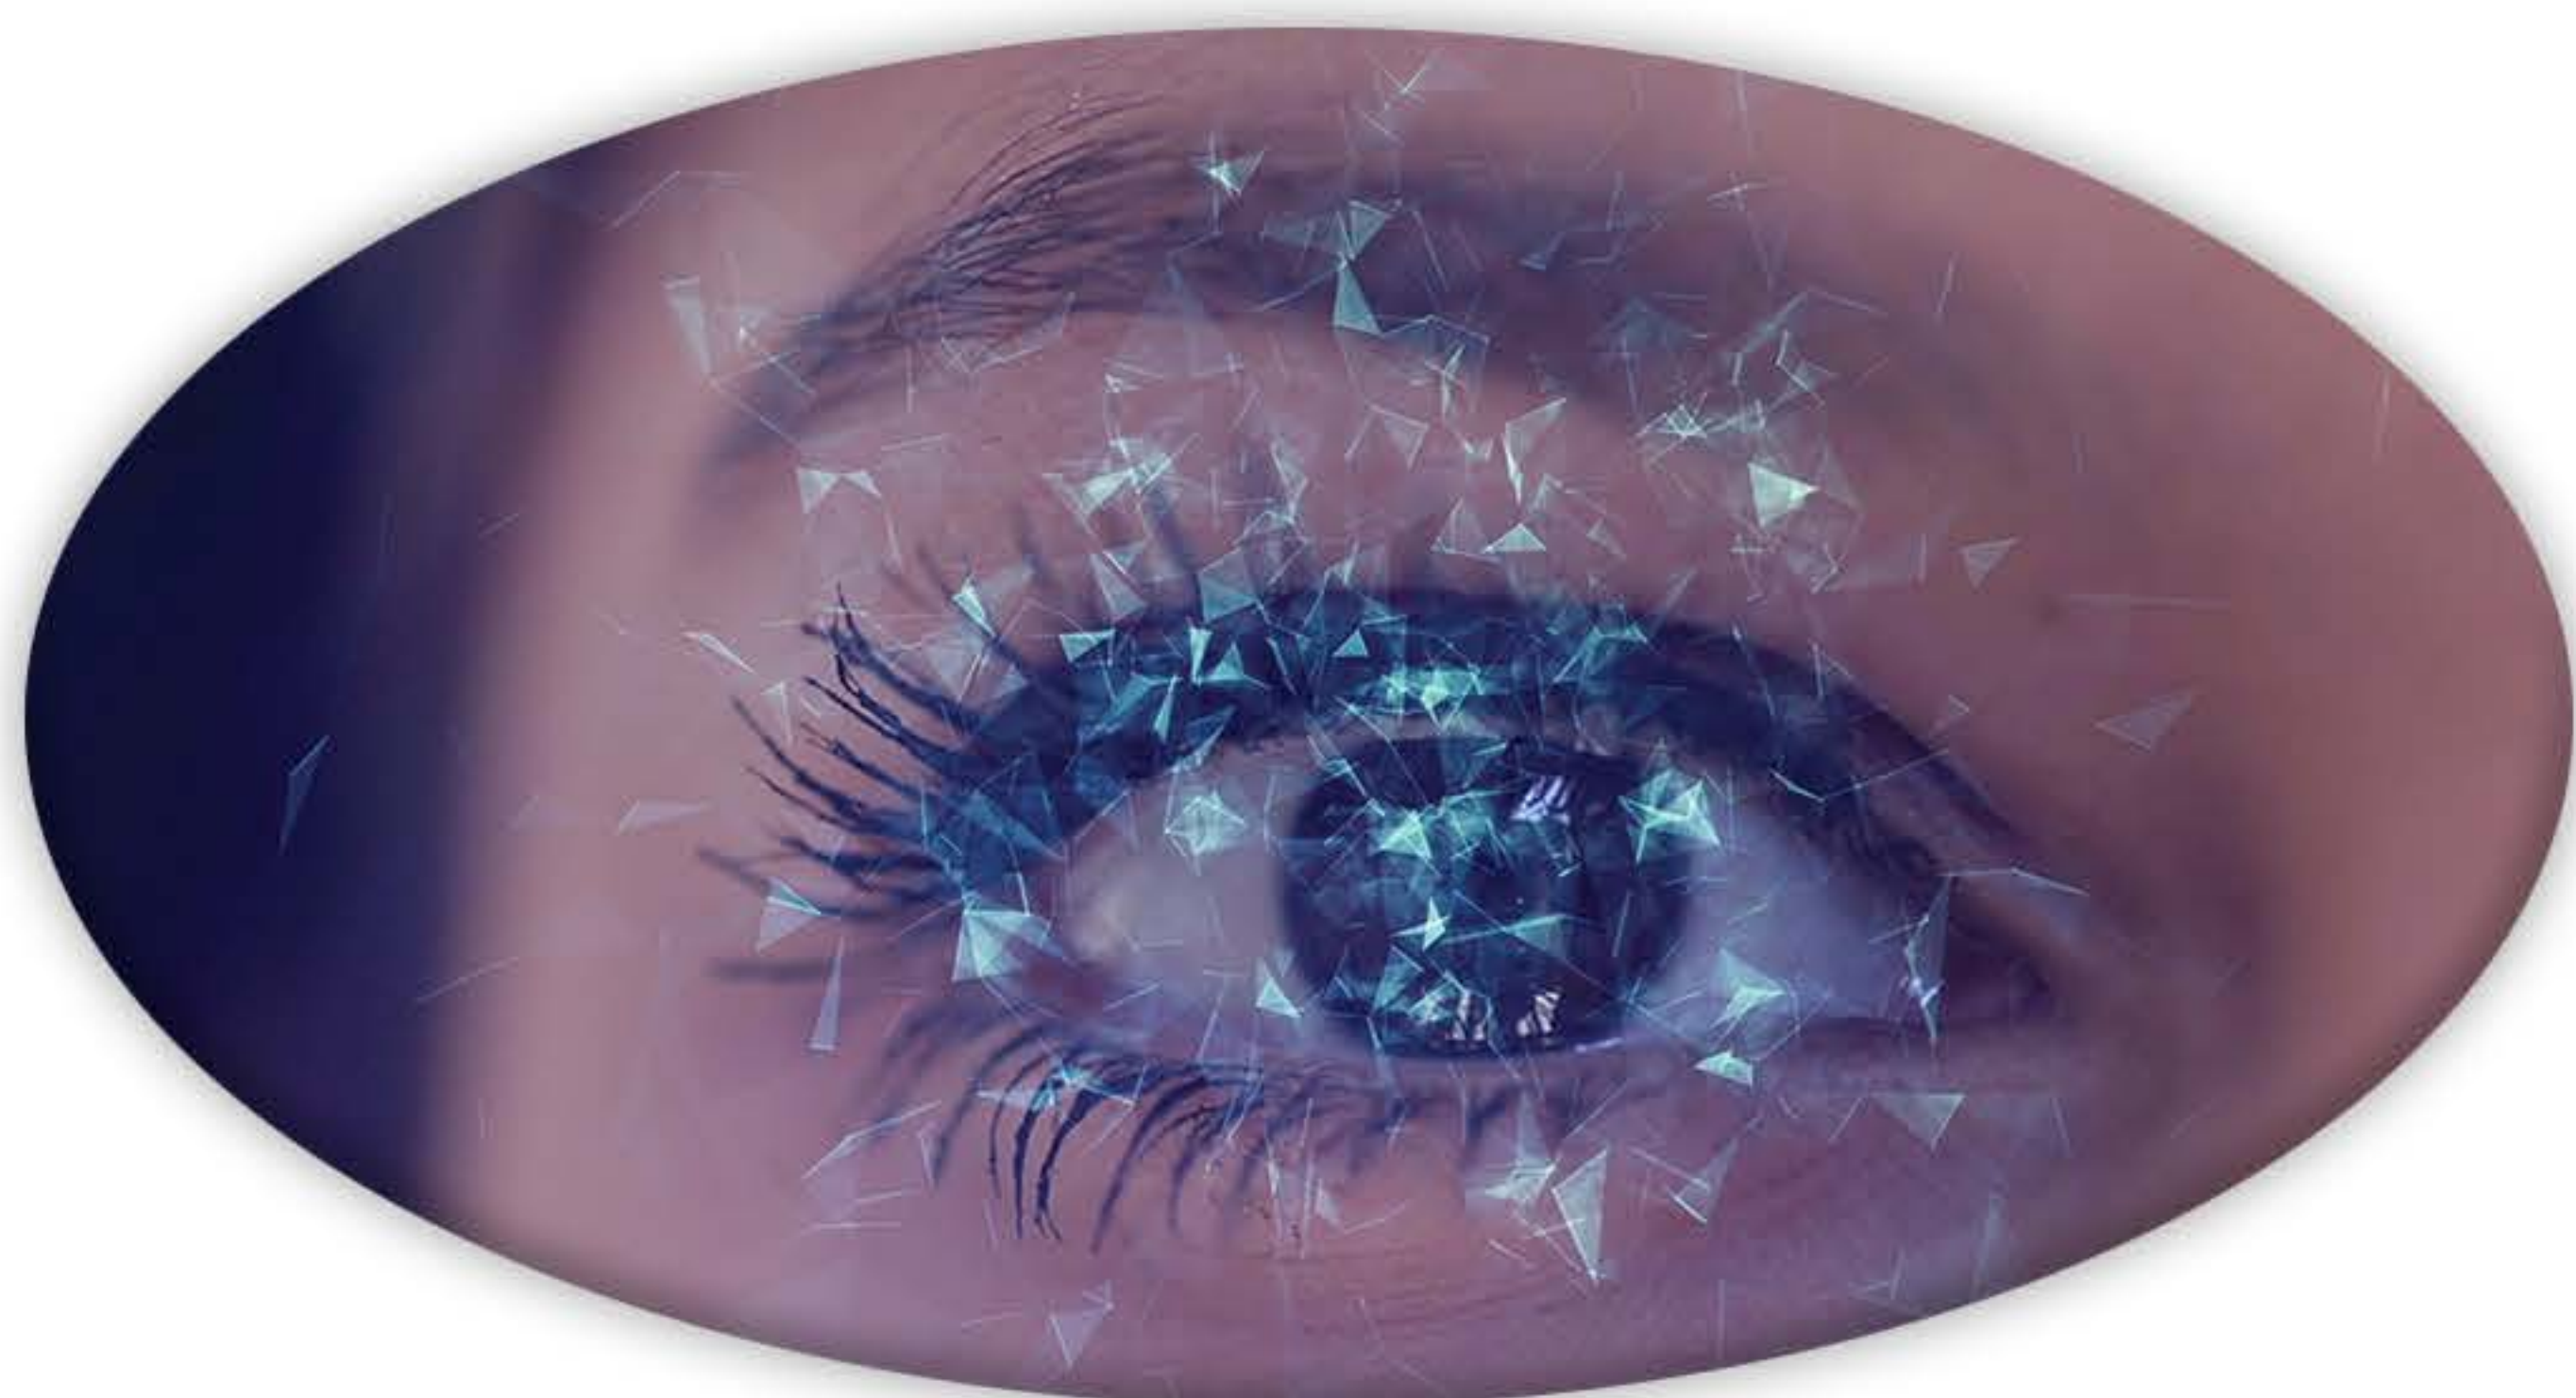

- Create and edit unique pagesets
- Web browsing & streaming
- eBooks
- Play music and video files
- Store and view photos
- Compatible with smart home devices
- Make or receive phone calls
- Send and receive text messages
- Send and receive emails
- Desktop control
- Eyeworld training video suite

Symbol Pagesets

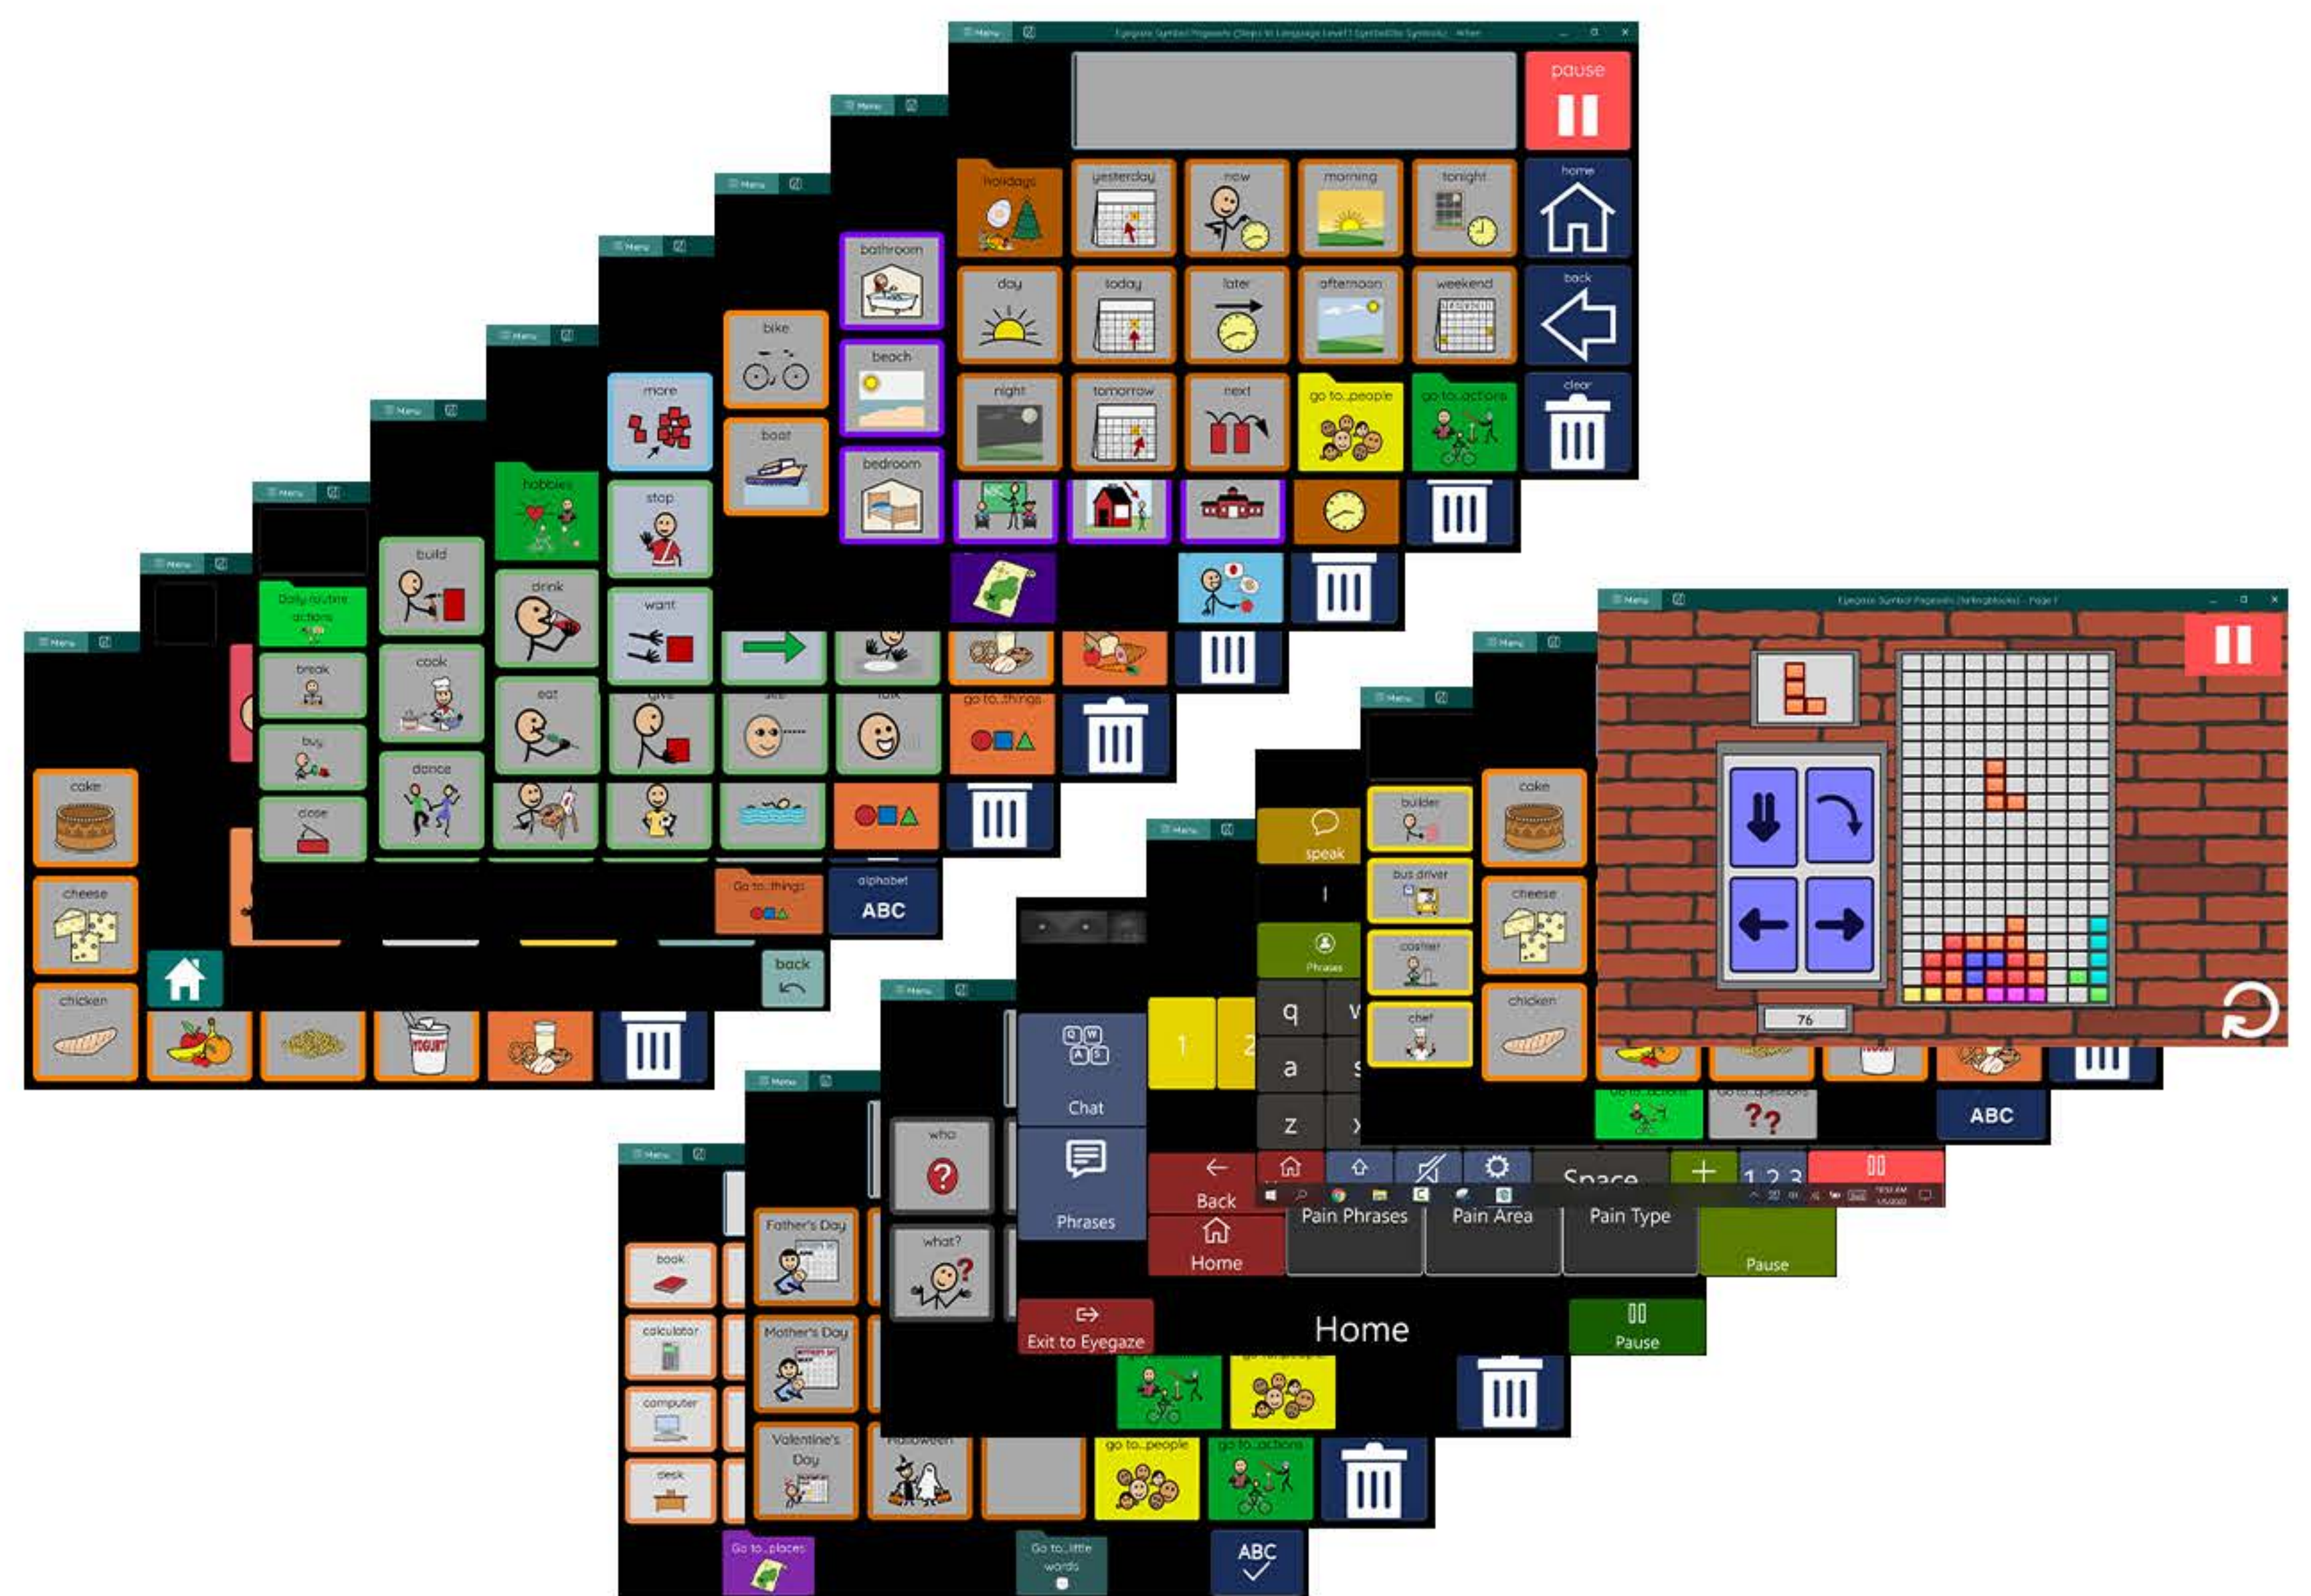

Perfect for language learners, Symbol Pagesets include 5 progressive vocabularies that grow with you.

- Beginner, intermediate, and advanced symbol pagesets available
- Picture-based boards use symbols and text to build sentences
- Use your own photos as symbols
- Includes tips for SLPs and teachers
- Vocabulary-appropriate QWERTY, ABC, and phonetic keyboards

Interactive Learning

- Choose from 38 animated activities that enable you to learn through exploration and play. Clean up the ocean, defend your spaceship, save farm animals, play Falling Blocks and more
- Key areas of learning include cause and effect, choice making, and challenges

About Us

It all began in 1986, when a group of engineers and medical professionals gathered in a basement in Virginia and founded Eyegaze Inc. Their goal was to develop an eye-controlled computer for people with disabilities. The first Eyegaze device was unveiled in 1987. Soon after, a police officer who was injured in the line of duty became its first user.

Where are we now?

- 35+ years of product development.
- Eyegaze Edge® devices are in over 50 countries.
- Eyegaze Edge® devices are available in multiple languages.
- 25 books have been written and published by our users.
- Our users are continuing to be employed using their Eyegaze Edge® devices.

Our Award-winning Eyegaze devices have a long-standing reputation for accuracy, reliability, and ease-of-use. Eyegaze Inc. is dedicated to delivering excellence in everything we produce. We are passionate about building the world's best eye tracking hardware and software solutions and delivering them with superior customer service. All of our eye tracking devices have consistent gaze point prediction and unmatched accuracy, even when a subject falls outside the "norm."

Testimonials

"My arms and hands were deteriorating quite rapidly meaning I couldn't work anymore. The Eyegaze saved my software engineering job. I can control a Mac and do everything with my eye that I used to do with my hands. I can respond to email, I can surf the web, and I can hold conversations..." - Jim, software engineer

"What a blessing... This device gave my wife COMPLETE independence in terms of communicating with people. She was able to read books and turn her own pages. She was able to read things on the internet, listen to music when she wanted to, play games, and order her own gifts for children and grandchildren all by herself... I could go on and on... I wanted to encourage you in the important work you do for those with disabilities. You are giving them a part of their life back." - Doug, husband

Thank you and everyone you work with. My son Jack is laying in his hospital bed right now using his Eyegaze to chat with his friends on Facebook, check his email, and he just posted on his web page... the nurses and doctors are amazed watching him do all of this with a breathing tube in his throat and about 20 other assorted lines attached to various parts of his body." -Al, father
