

The Encore Camera

Encore, the latest addition to our award winning Eyegaze Edge[®], has made a big splash in the assistive technology community. With the release of Encore, the Eyegaze Edge[®] speech generating device is more versatile than ever! Encore gives users freedom of head movement while retaining Eyegaze Inc's world-renowned accuracy. Encore can now track both eyes while adaptively switching between monocular and binocular tracking as needed. With this capability, the Eyegaze Edge[®] reaches more people than ever before. Patients with involuntary movement disorders now have access to medical-grade eye tracking. Freedom to move your head without loss of tracking is extremely comforting to both users and caregivers. Encore's new sleek design makes using the Eyegaze Edge[®] more intuitive. This advanced camera is ideal for patients who have head movement, sporadic muscular movements, or for those who mount their speech generating device to their wheelchair. Eyegaze Inc. is excited to introduce this life-changing eye tracker to the world. Learn more about Encore at eyegaze.com.
